

LINDA KARANI

Data Scientist

I am a data scientist with 4+ years of building data intensive tools, data processing, data analysis and visualization, predictive modeling and converting raw data into actionable insights through interactive and analytical dashboards. Proficient in supervised and unsupervised machine learning, advanced statistical analysis as well as scripting languages including R and Python. I also excel at creating value for stakeholders and using data analytics to convey information in a way that is clear and beneficial for end users. I am passionate about using data to identify trends and drive development and enjoy learning and taking up new challenges.

EDUCATION

2021
|
2023

Strathmore University

Masters of Science in Data Science and Analytics 📍 Nairobi, Kenya

Relevant units: Advanced machine learning concepts, Advanced statistical analysis, Data visualization and communication

2014
|
2018

Strathmore University

Bachelor of Business Science in Financial Economics 📍 Nairobi, Kenya

PROFESSIONAL EXPERIENCE

2021
|
Current

Senior associate- Data analysis and business modelling Sanergy

📍 Nairobi, Kenya

- Was part of a team that led data management and analysis for a multinational corporation to identify areas in the city with the greatest potential for introduction of non-sewered sanitation products to allow for future upscale
- Developed several robust quantitative and qualitative data collection tools for citywide inclusive sanitation planning to determine market share and predict an appropriate mix of sanitation products based on key indicators and metrics.
- Analyzed data collected by the Cost and Climate in Urban Sanitation (CACTUS) project led by the University of Leeds and supported by the Bill and Melinda Gates Foundation and used the findings to create a set of improved data collection tools and manuals to facilitate widespread contribution to a database of benchmark cost estimates to inform sanitation investment decisions.
- Effectively communicating analysis and project results to senior leadership and external stakeholders
- Completion of diverse advisory projects with a high standard of quality and production of comprehensive analytical reports
- Conducted data analysis for a UNICEF implemented project to inform progress towards safely managed sanitation
- Proactive stakeholder management and advisory services
